## Company Cars and Vans

These taxable benefits generally arise on employees earning £8,500 or over (including benefits) and directors. **Company car benefit** is calculated as a percentage (based on the car's CO<sub>2</sub> emissions rounded down to next multiple of 5) of the car's UK list price. The normal minimum rate is 10%. Diesel cars generally suffer a 3% supplement on top of the CO<sub>2</sub> emissions-based percentage. The maximum rate for all cars is 35%. Special rules apply to certain environmentally friendly cars.

**Company car fuel benefit** is charged unless the cost of all fuel for private use is borne by the employee. The taxable benefit is calculated by applying the appropriate car benefit percentage to £20,200. Where VAT is to be reclaimed on fuel for private use, the employer also has to account for output tax based on a fuel scale charge derived from the vehicle's CO<sub>2</sub> emissions (see table below).

**Company van benefit** is not related to CO<sub>2</sub> emissions but is a set figure of £3,000 with an extra £550 where fuel for private use is provided. There is no benefit charge for certain environmentally friendly vans or where the restricted private use condition is met.

### Mileage rates for employees using their own cars for business:

Approved rates are 45p per mile for the first 10,000 miles and 25p thereafter. Income tax and NICs may be due on higher rates and tax relief may be due on lower rates.

### VAT fuel scale charges for 3 month return period beginning on or after 1 May 2012 (round CO<sub>2</sub> emissions down to next multiple of 5)
